

# MARC LEBRETON

Business Development — Payments & Digital Assets, Brazil and LATAM

São Paulo, Brazil · write2marc@gmail.com · **[phone]** · **[LinkedIn]**

Portuguese (fluent) · English (fluent) · Spanish (fluent) · Based in Brazil, available to travel

---

## PROFILE

---

Commercial and business development operator in Brazilian fintech and digital assets, with a completed zero-to-one market build behind me. Took Crypto.com's Latin America business from nothing to **6M+ users and the #1 app position in the region**, running commercial strategy independently from pipeline through to signed agreement, and negotiating the local partnerships — payment providers, banking rails, distribution channels — that made the product operable in market. Fluent in how stablecoin settlement and treasury flows actually work, and in the Brazilian rails, QR standards and acquiring landscape a merchant acceptance play depends on. Comfortable owning a single market end to end and deciding how it gets built.

## SELECTED OUTCOMES

---

- **0 → 6,000,000+ users and #1 app in Latin America** — Crypto.com regional market entry, built on locally negotiated partnerships rather than paid acquisition alone
- **0 → 130,000** — built Sui Foundation's regional channel from a standing start
- Negotiated and closed the local payment, banking and distribution partnerships required to launch a regulated digital-asset product across multiple Latin American markets
- Ran commercial strategy independently — sourcing, qualifying, pitching, negotiating and closing, then driving partners to live and transacting
- **[Payments deals: acquirers, PSPs, aggregators or merchants you personally brought in — name them and the volume]**
- **[Largest contract closed: value, term, counterparty type]**

## EXPERIENCE

---

### Sui Foundation — **[job title]**

**[city]** · **[start]** – **[end]**

- Grew the regional channel from **0 to 130,000** from a standing start
- Sourced, negotiated and closed ecosystem and commercial partnerships across the region, then drove them to launch
- Fed in-market feedback back into product and ecosystem priorities

### Crypto.com — **[job title]**

**[city]** · **[start]** – **[end]**

- Owned Latin America market entry end to end, scaling from zero to **6M+ users** and the **#1 app position**
- Ran the full commercial cycle — sourcing and qualifying counterparties, pitching, negotiating terms, and closing — across payment providers, banking partners and distribution channels
- Negotiated and prioritised local payment rails and settlement arrangements, working with PIX and local banking infrastructure
- Coordinated with legal and compliance on licensing, settlement and regulatory requirements in each market before launch
- Drove signed partners to integration and live transaction volume, treating time-to-first-transaction as the metric that mattered
- Channelled merchant and partner feedback into product priorities — flows, settlement currency and reconciliation
- **[Team led, if any: size and functions]**

**[Company] — [job title]**

**[city] · [start] – [end]**

- **[Any merchant acquiring, PSP, aggregator or payments-adjacent experience belongs here and should lead — it is the single requirement this CV is thinnest on]**
- **[Achievement]**

## **MARKET KNOWLEDGE — BRAZILIAN PAYMENTS**

---

**Rails and standards** PIX, including static and dynamic QR (Pix QR Code), Pix Automático and Pix Parcelado · boleto · TED · card rails and installment (parcelamento) dynamics · settlement and reconciliation flows

**Acceptance landscape** Acquirers and sub-acquirers — Cielo, Rede, Getnet, Stone, PagBank, SumUp, InfinitePay · gateways and PSPs — Pagar.me, Adyen, dLocal, EBANX, Zoop, Malga · marketplace and wallet acceptance via Mercado Pago and PicPay

**Regulatory** BCB Resolutions 519, 520 and 521, in force 2 February 2026 — foreign-currency stablecoin operations reclassified as FX, bringing IOF-Câmbio into merchant settlement economics, mandatory BCB reporting from 4 May 2026, and PSAV authorisation required to intermediate or custody crypto assets · payment institution (IP) authorisation · LGPD

**Digital assets** Stablecoin settlement and treasury flows · multi-chain and multi-wallet operations · on- and off-ramp economics · **[specific stablecoin payment products you've worked with, if any]**

## **CAPABILITIES**

---

**Commercial** Independent pipeline build · sourcing and qualification · commercial negotiation including multi-year and enterprise structures · contracting with legal and compliance in the loop · partner activation and volume management

**Markets** Brazil · **[other LATAM markets you covered]**

**Tools** **[CRM and analytics stack you've used]**

## **EDUCATION**

---

**[Degree — institution — year]**
